## Light Fund Coming Up Short In C. P.

At the dinner meeting of the Canal Point Lions Club Monday evening, the street lights committee, composed of Albert Fremd, Alton Jones and Delmar L. Hooks, reported only half of the \$400 necessary to finance the cost of street lights in the community of Canal Point for the coming year has been collected to date and the balance must be collected by June 30 in order to renew the street lighting contract with the Florida Power and Light Company.

It was again pointed out at the meeting that since Canal Point is not an incorporated town, the Lions Club is acting as agent for the community in its dealing with the FP&L as a public service and the full cooperation of the residents of the community benefiting from the street lights will be appreciated.

The community's street lighting system, started two years ago through the Lions Club leadership, now includes 21 street lights extending from the Canal Point Packing center to the Community Park. Additional lights were also installed at the children's playground adjoining the Community Park on the south last winter following the opening of the new playground.

## Cinematic Chatter By Malcolm Millar

Hello everybody! Fourteen-year old Billy Gray is one motion picture actor who'll be perfectly content to retire from acting at the ripe old age of sixteen. "It's not that I don't enjoy acting," Billy explains. "I've been having a lot of fun as an actor, but what I really want to be when I grow up is a cameraman. I figure in another couple of years I'll be too old for kid roles and too young for anything else. With a non-acting career in mind I won't be going around with a broken heart like some former child actors who don't attain stardom as adults." Billy is systematically preparing for his future as a cameraman. When he wasn't acting in front of the camera he was following Wilford Cline, the director of cinematography, around the set like the proverbial

shadow. From Cline he is learning about camera angles and the importance of proper lighting. On Sundays when Billy has neither school nor studio chores he sometimes sees as many as four motion pictures during the day. "It's the best way to learn about motion pictures making," he declares. "And I learn most from the bad ones. From them I can see what mistakes not to make. When the pictures are good I'm too interested in the story and the acting to think of camera technique. The good pictures I have to see a second time to concentrate on how they are photographed. And, according to Mr. Cline, Billy is learning fast. Which reminds me, Talent Scout Night starts at the Prince Theatre June 29 and at the Hugo on July 1st. Better register and brush up the old act fellahs. See you at the movies—Mal.

# WHICH ONE DO YOU WANT ?

*you can have your dream house—this easy way!*

A dream? Not at all. Thousands of people with modest incomes have been able to save the down payment, or the whole price, of the home of their dreams—because they invested in U. S. Savings Bonds on the Payroll Savings Plan. Look at the chart on this page. See how you can accumulate enough money for the down payment on a home. Or enough for your children's college education or a retirement income. And by saving only a few dollars a week, too:

The answer is that you save *systematically* on the Payroll Savings Plan. All you have to do is tell your pay office how much you've decided to save each payday (it can be as little as a couple of dollars). After that your money is saved *for* you, *before* you get your salary. Then each time enough has accumulated, it is invested in a Bond, and the Bond turned over to you.

And remember—your U. S. Savings Bonds now will bring you an average of 3% interest, compounded semiannually, for 19 years and 8 months. That's why the money you put into Bonds now grows to such a surprisingly big sum.

Why don't you start—today? Sign, where you work, for the Payroll Savings Plan. Or, if you're self-employed, have your banker enroll you in the Bond-A-Month Plan. It's as easy as the Payroll Savings Plan:

*How you can reach your savings goal  
on the systematic Payroll Savings Plan*

### Plans Are Made For Bridge Opening

ST. PETERSBURG — Elaborate plans are being made for an enormous celebration to herald the official opening of the new bridge across lower Tampa Bay connecting Pinellas and Manatee counties. To be known as the Sunshine Skyway, the bridge is 25 miles long and was built at a cost of \$22,000,000.

It was hoped that the bridge could be officially dedicated August 9, but the State Road Department announced this week that it could not be opened that soon and the official date is now set for Labor Day, Sept. 6.

Many state and national dignitaries will participate, and it is hoped that General James A. Van Fleet will return from his second Korean mission in time to be the guest of honor and principal speaker.

The General came to Florida last week for the opening of a new soft drink plant at Lake Alfred by the Cantrell and Cochran Peninsular Corporation of which he is chairman of the board, attending the ceremonies at Cypress Gardens. But following his report to President Eisenhower, he was ordered back to the Far East on a second diplomatic mission.

Ten South Florida counties will participate in the bridge opening ceremonies which are scheduled to last a full week.

### General Van Fleet Honored At Luncheon

WINTER HAVEN — Speaking at a luncheon in his honor, staged at Cypress Gardens last week, General James A. Van Fleet told a gathering of civic, business and political leaders that Florida, and particularly his native Polk County, "has a great industrial potential."

Here or the formal opening of a new soft drink manufacturing plant at Lake Alfred to be operated by the Cantrell and Cochran Peninsular Corporation of which he was elected chairman of the board earlier in the day, the General interspersed a short talk on the future of Florida with a statement on the situation in the Far East.

Saying that he had returned to the States from his diplomatic mission to the Far East to report to the President, he expressed optimism over the situation.

He said that with a strong Korean Army, supplemented by 44 divisions of Nationalist China and with the know-how and industrial strength of Japan, he hoped there would be no need "to send American boys half way around the world."

Speaking of his beloved Florida, the General told how the new soft drink plant at Lake Alfred would use grapefruit juice and serve the Southeast as well as Latin America. The new product will be put up in cans and the plant will be in operation in about 10 days.

At the Cypress Gardens meeting Walter S. Mack, president of the Cantrell and Cochran national organization, praised the General for being responsible for bringing the industry to Florida.

He predicted that Florida would be the greatest industrial state in the South within the next 10 years, and stated that C and C hoped to grow with Florida.

### WPB Grower Signs With Minute Maid

WEST PALM BEACH — David Gerli, Palm Beach County horticulturist and grower, has just signed a contract with Minute Maid Corporation to furnish an exclusive supply of bud wood of Harvey lemon stock.

Mr. Gerli has pioneered the Harvey lemon on his groves at Loxahatchee. The Harvey is recognized as outstanding as a lemon for juice purposes. It will primarily be used for concentrate as it has more juice and the oil is better, with few pits, being almost seedless as compared to the California lemon. The initial order for bud wood calls for 20,000 buds.

*Uncle Sam made the bonds you own  
an even better bargain!*

# Now your maturing Series E Bonds can earn interest 10 more years at 3%

PRESENT TREASURY REGULATIONS make it possible for you to collect a return of as much as 80% on the Series E Savings Bonds you already own!

For now those Bonds which you invested in 10 years ago can go right on earning interest for ten more years without your doing a thing about it! That is true not only of the Bonds which you have held for ten years, but any other Series E Bonds which you have invested in in the meantime. And any Series E Bonds which you obtain now will also enjoy the extended earning period. They will start earning interest sooner and mature earlier, too, paying 3%, compounded semiannually.

The Bond you got for \$18.75 can now pay you \$33.67 ... a \$37.50 Bond will be worth \$67.34 ... and so on.

Of course, any Series E Bond may still be redeemed at any time after you have held it for two months. But, like any other form of saving, your Bonds will mean a great deal

more to you if you can hold on to them.

Are you one of the millions of Americans who are saving regularly with Savings Bonds through the Payroll Savings Plan? If you're not, why not start now? Invest regularly in Bonds through the Payroll Savings Plan where you work. Ask your pay office to save as little as 25c a week for you, or as much as you are able.

If you can save just \$5 a week regularly through the Plan, in five years you will have \$1,367.90 ... in 9 years and 8 months, you'll have \$2,850.70 ... and in 19 years and 8 months, \$6,872.45! This Plan is one sure way to save because it saves something out of every check before you have a chance to spend it.

So join the Payroll Savings Plan where you work today. Or, if you are self-employed, start the Bond-A-Month Plan where you bank. It's safe, it's sure, it's automatic. And you will be helping yourself and your country!

**If you want to be paid  
your interest as current income—  
invest in 3% Series H**

If you want a good, sound investment which pays you your interest by check every six months, ask at your bank about United States Government Series H Bonds. Series H is a new current income Bond available in denominations of \$500 to \$10,000. Redeemable at par after 6 months and on 30 days' notice. Matures in 9 years and 8 months and pays an average 3% interest per annum if held to maturity. Interest paid semiannually by Treasury check. Series H may be purchased at any bank, annual limit \$20,000.

## Christian Science Group Of Canal Point

"Is the Universe, Including Man, Evolved by Atomic Force?" will be the subject of the Lesson-Sermon to be read at Christian Science services Sunday.

Man's dominion over materiality is stressed in readings from the Bible and from "Science and Health with Key to the Scriptures" by Mary Baker Eddy. The Scriptural selections include the account as given in Matthew (14: 22-32) of how Christ Jesus and Peter walked on the sea.

Readings from Science and Health include the following:  
"In proportion as matter loses to human sense all entity as man, in that proportion does man become its master. He enters into a diviner sense of the facts, and comprehends the theology of Jesus as demonstrated in healing the sick, raising the dead, and walking over the wave. All these deeds manifested Jesus' control over the belief that matter is substance, that it can be the arbiter of life or the constructor of any form of existence" (369-5).

The Golden Text is from Psalms: "God hath spoken once; twice have I heard this; that power be longeth unto God" (62:11).

## Rozelle Boys' In Automobile Wreck

George and Jimmy Rozelle, son of Mr. and Mrs. Frank Rozelle, Sr., of Pahokee, students at Georgia Institute of Technology in Atlanta, were injured in a traffic accident early Sunday morning near Montezuma, Ga., en route home.

Both boys were hospitalized following collision with a truck hauling watermelons. Extent of Jimmy's injuries have not been fully determined, although he is said to have undergone a fractured hand and severe bruises. He was thrown through the windshield of his car.

George, who was asleep in the front seat of the car which his brother was driving, was also thrown out of the car but not injured except for bruises. The car was demolished and the truck with which they collided is reported to be damaged.

## Turnpike Opponents Will Bring Suit

Opponents of the present route of the bobbait turnpike settled down to what they believe may be a lengthy and expensive court battle this week in an attempt to halt construction of the proposed road. Lawrence Hagen, president of the Palm Beach County Landowners Association told the county commission Monday that his group had instructed its attorneys to initiate court action to halt construction of the turnpike on the route which has been surveyed by the State Turnpike Authority.

"We have been told that we have good grounds for legal action," Hagen told the commission.

He said he believed that the court fight would be made as expensive as possible for the association but that they were prepared to carry out the battle until some decision is reached. Hagen said a fund drive was being carried out within his organization to raise money for the court case and that contributions from interested persons outside the association, are being accepted.

Hagen told the commission that his association believed the proposed route near Military Trail would not serve the best interests of the county.

The Landowners lead an unsuccessful move to have the location of the road moved west of State Road 7.

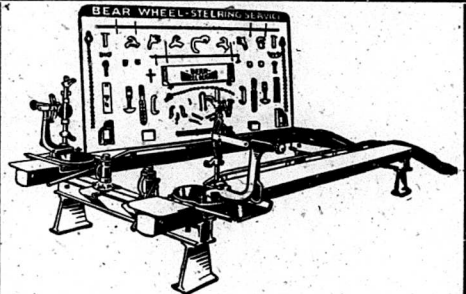

Hagen said his group would not oppose the use of State Road 9 right of way for the toll road.

In the event the state decides to build a full-length turnpike, Hagen said his association would not oppose the location of the road, regardless of where it was placed.

The project in the 1954 road department budget for this county. For 18 projects throughout the state, the department received low bids totaling \$2,740,790.

## Cattle Industry Gains More Than Beans

The county's cattle industry in recent months has been showing a better gain than this area's traditional vegetable growing operations, the county commission was advised Monday.

Reports from the office of County Agent M. U. Mounts listed sales at the Belle Glade Livestock Market as the best in the state during May. Some 5,800 head of cattle brought a total of \$373,439 the report showed.

In the vegetable operation, Mounts said the past season for Glades farmers has been one of poor yield and low prices. Coastal farmers, he said, did much better financially. Weather was blamed for the poor yield.

During the past season, the agents office said, a total of 10,104 carloads of vegetables had been shipped out of the county by rail and 8,602 carloads left by truck.

## Fellowship Supper Held By Methodists

## Lions Club Hears Dr. Emil Wolf

Dr. Emil Wolf, horticulturist at the Everglades Experiment Station, was guest speaker at the Tuesday luncheon meeting of the Pahokee Lions Club.

Introduced by Robert J. Schroder, who was in charge of program arrangements, the speaker told of the work being done at EES in the breeding of sweet corn varieties to develop strains better adapted to growing conditions in the Glades area than the various strains now being extensively grown by Glades growers for Northern markets. The EES goal is to develop a variety or varieties of sweet corn that will grow prolifically in the Glades and South Florida in general, will be blight-free or highly resistant to blight and at the same time produce large yields of ears of corn that are highly acceptable to the consumer in appearance, size and flavor, Wolf said. The heavy inroads of blight which damaged the Glades sweet corn crop this spring, causing hundreds of acres to be abandoned and reducing the quality and yields of hundreds of other acres, greatly increased the costs of sweet corn production and makes the success of the EES sweet corn breeding work doubly important to the economic future of Glades agriculture, he added. The club voted a \$15 contribution.
